

“MIRTEC’s MV-7 OMNI Systems have dramatically increased our defect detection capability, significantly improving quality levels in both our internal metrics and in the eyes of our customers. Their exclusive OMNI-VISION 3D Inspection Technology produces amazingly clear images of our SMT components and solder joints, virtually eliminating the need for human optical inspection. We are able to seamlessly move programs across multiple production lines with extreme repeatability allowing us to maximize our production efficiency.”

*Dave Griffith — VP Quality and Engineering, Inovar Inc.*

## OMNI-VISION® 3D Inspection Technology

- ▶ Digital Multi-Frequency Quad Moiré
- ▶ 15 Mega Pixel CoaXPress Camera Technology
- ▶ 10 um/pixel Telecentric Compound Lens
- ▶ 10 Mega Pixel SIDE-VIEWER® Camera System
- ▶ Six Phase Color Lighting System
