

“Out of the Box Manufacturing, is committed to exceeding our customer's expectations in providing the highest quality products at a competitive price with consistent on-time delivery. At OBMFG we drive our processes to foster a culture of creativity and continuous improvement. After extensive research on all of the 3D AOI systems available on the market, MIRTEC clearly rose above the competition based on inspection performance and ease of programming. What stands out the most about MIRTEC, however, is their customer service. The MIRTEC team is highly competent and extremely responsive. I can confidently say I have never had better customer service, ever! Without a doubt, the MV-6 OMNI machine has been one of the most important pieces of capital equipment that OBMFG has purchased to date. If you are in the market for a new AOI solution, do yourself a favor and check out what MIRTEC has to offer.” Tristan Campbell - Quality Manager, Out of the Box Manufacturing
